

In the Sequence Listing

Applicants enclosed a substitute Sequence Listing in paper copy and computer readable format (diskette) with the response filed on 21 August 2008. The substitutes included the primer sequences noted by the Examiner on page 10, lines 6-7, which were originally inadvertently omitted from the Sequence Listing.

As required, Applicants stated that the content of the paper and computer readable copies of the Sequence Listing are the same and include no new matter.

The Notice not indicating any problem with the substitute Sequence Listings previously filed, they are not again enclosed with this response.
